Top Skills

Machine Learning

Data Visualization

Data Visualization with Python

Certifications

Python for Data Science, AI & Development

Data Analysis with Python

Machine Learning with Python

Data Visualization with Python

Databases and SQL for Data Science with Python

Muhammad Usman

Future Data Scientist | AI and ML Engineer
Faisalabad, Punjab, Pakistan

Summary

I am a passionate Data Science student with a strong interest in using data to solve real-world problems and uncover meaningful insights. Over time, I have built a solid foundation in data analysis, machine learning, and data visualization, while working with tools such as Python, SQL, Pandas, NumPy, Matplotlib, and Scikit-learn. Through my learning journey, I have worked on different academic and personal projects that helped me strengthen my skills in data cleaning, exploratory data analysis, and predictive modeling. These experiences have taught me how to approach data with curiosity, think analytically, and turn raw information into useful outcomes. What excites me most about Data Science is the ability to combine technical skills with problem-solving to make better decisions based on data. I enjoy learning new technologies and continuously improving my knowledge in machine learning, artificial intelligence, and analytics. I am currently looking for opportunities where I can apply my skills, gain practical experience, and grow as a data professional. I am eager to connect with professionals in the field, learn from experienced mentors, and contribute to projects that create real value through data.

Education

Virtual University of Pakistan

Bachelor's degree, Computer Science · (September 2023 - March 2027)

Govt. Municipal Graduate College Jaranwala Road, Abdullahpur ,
Faisalabad

Intermediate in Computer Science, Mathematics and Computer
Science · (June 2021 - March 2023)
